

Proving Triangles Congruent
-----------------------------

1. Given:  $\overline{RY} \parallel \overline{GA}$ ;  $\angle G \cong \angle R$   
Prove:  $\triangle GYA \cong \triangle RAY$

2. Given:  $\overline{TA}$  bisects  $\angle BAR$ ;  $\angle BTA \cong \angle RTA$   
Prove:  $\triangle BAT \cong \triangle RAT$

3. Given:  $\overline{LY} \parallel \overline{DN}$ ; I is the midpoint of  $\overline{LD}$   
Prove:  $\triangle LIY \cong \triangle DIN$

4. Given:  $\overline{FE} \perp \overline{DE}$ ;  $\overline{FG} \perp \overline{DG}$ ;  
 $\overline{DE} \cong \overline{DG}$

Prove:  $\overline{EF} \cong \overline{GF}$

5. Given:  $\overline{AB}$  is  $\perp$  bisector of  $\overline{CD}$

Prove:  $\overline{AC} \cong \overline{AD}$
